PROFESSIONAL SUMMARY

Business Analyst with three years of experience in banking technology, delivering requirements analysis, process improvement and business intelligence for enterprise banking applications. Skilled in requirements gathering, stakeholder management, KPI definition, dashboard design and automated Power BI reporting, with hands-on experience turning ambiguous business problems into data-driven decisions. MBA in Business Analytics from BITS Pilani (CGPA 9.07/10) and Microsoft Certified: Power BI Data Analyst Associate (PL-300).

CORE SKILLS

Business Analysis: Requirements Gathering, Requirements Elicitation, BRD / FRD, Functional Specifications, User Stories, Use Cases, Process Mapping, Gap Analysis, Impact Analysis, UAT Planning & Execution, Change Request Management, Stakeholder Management

Data & Business Intelligence: Power BI, DAX, SQL Server, T-SQL, Advanced Excel, Microsoft Fabric, PySpark, Data Modelling, ETL / Data Pipelines, SCD Type 1 & 2, Dashboard Design, KPI Definition

Domain: Banking Operations, Enterprise Workflow Automation, Document Management & Approval Systems, Recruitment Workflow Automation, SLA & TAT Management, Compliance and Procurement Processes

Tools & Methodologies: Jira, Confluence, GitHub, Agile, Scrum, SDLC, Waterfall

Analytics & AI: Python, Decision Tree & Classification Models, Statistical Analysis, Process Mining, Generative AI, Prompt Engineering, Retrieval-Augmented Generation (RAG)

Technical Awareness: React, Spring boot, ASP.NET Core, C#, REST API Integration – able to review technical feasibility and translate between business and engineering teams

PROFESSIONAL EXPERIENCE

HDFC Bank – Mumbai, India

Deputy Manager – IT (Business Solutions Group)

July 2023 – Present

- Collaborated with business stakeholders and product teams to gather requirements, prepare BRDs/FRDs, and translate business needs into functional enterprise solutions supporting banking operations for 3 enterprise banking applications.
- Coordinated end-to-end solution delivery through UAT planning, defect resolution, change request management, and 60+ production deployments, ensuring the successful implementation of business-critical applications.
- Collaborated with business and technical teams to analyse workflows and implement enhancements across 3 enterprise applications, improving process automation and user experience for banking operations.
- Led business process improvement initiatives by modernising legacy applications and integrating budgeting, compliance, procurement, and reporting modules into a unified workflow.
- Developed 12+ automated notification schedulers and workflow monitoring solutions to improve process visibility and support timely business operations.

KEY PROJECTS

Workflow Analytics & SLA Prediction for Banking Operations | MBA Capstone (Real Banking Data)

- Analysed real banking workflow data to measure turnaround time (TAT), SLA compliance and operational bottlenecks across approval stages.
- Built a Decision Tree classification model to predict SLA breaches before they occur, achieving 97.5 accuracy, enabling pre-emptive escalation of at-risk cases.
- Developed an interactive Power BI dashboard for SLA monitoring and management reporting, and applied process mining to recommend targeted process improvements.

Retail Data Quality & Profitability Insights | Microsoft Fabric

- Built an end-to-end Medallion (Bronze – Silver – Gold) data pipeline in Microsoft Fabric using PySpark to clean, transform and integrate multi-source retail data.
- Delivered Gold Delta tables and a Power BI dashboard tracking profitability, inventory turnover, return rates and core business KPIs.

PICS Attestation Services | Business Management & Customer Service Platform (Live)

- Gathered requirements and defined the process flow for a live customer-facing platform serving 400+ customers per month across appointment booking, document submission, application tracking and automated notifications.
- Designed business dashboards tracking 10 operational KPIs and role-based workflow modules to support day-to-day operational decisions.

EDUCATION

MBA, Business Analytics – BITS Pilani (Pilani Campus) | 2024 – 2026 | CGPA: 9.07/10

B.Tech, Electronics & Telecommunication – NMIMS, Mumbai | 2019 – 2023 | CGPA: 3.62/4

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Microsoft Fabric Data Engineering: Real-Time Projects (Udemy)
- ASP.NET Core Web API Development (Udemy)
- Machine Learning with R (Alison)
- Project Management Foundations (LinkedIn Learning)
- Google – Discover the Art of Prompting (Coursera)

PUBLICATION

- Pillai, S. – "Probability of Heart Disease using Various Machine Learning Algorithms", 2023 International Conference on Advanced Computing Technologies and Applications (ICACTA), Mumbai, India.
